MAP OR LOCATION-BASED

25

IN FIRST 7 HOURS

Submissions by primary field

The pattern: the room is overwhelmingly building **hyperlocal, map-based community coordination**. Sharing / circular economy, civic reporting, and local-action maps together are roughly half of all submissions. The recurring shape is "drop a pin, share a surplus or a concern, surface what's already working locally, then copy it street to street." Food / gardening and learning / coaching are the next two pillars. Deep-tech (enzymes, plastic-eating fungi, pollution-data infra) is a small but standout minority.

What's inside each field

Local Sharing & Circular Economy (~10)

Ripe (neighbor produce), BarangaySwap, Commons (map of the informal city), ChronoShare (timebank), iGotchu (mutual-aid matching), Re-Use Material app, urban waste to maker materials, neighborhood barter, a contribution ledger, AR clothing repair.

Civic Tech & Community Accountability (~7)

Chicago air-quality tool, NYC citizen-concern map, Rooted, GREENIFI (L.A.W. civic action), Tainha AI civic phonebooth, FieldSignal (emergency reporting), community-care webapp.

Food, Gardening & Regenerative Ag (~7)

SeedBurst, EDEN Commons almanac, Growing Green, food-yield maximizer, plant-ID / edibility, eco recipe swaps, herbal plant ID.

Learning, Skills & Coaching (~7)

ApTiPlant skill roadmap, teacher-in-residence, SolarPunk Farm game, mission-based learning, a SolarPunk guide, Habi and GreenHabits sustainability coaches.

Coordination & Open Infrastructure (~6)

FORGE (open-source community projects), off-grid text networks, project-merging, decentralized research, low-power bus-stop displays, an org / trust-reputation system.

Maps & Citizen Sensing (~4)

Visible (AI photo to green-action map), Sound of the Earth (audio biodiversity map), sustainable-community hub map, citizen climate-data for urban planning.

Deep Tech, Materials & Energy (~5)

PETase enzyme ML, plastic-eating mushrooms, pollution-data infrastructure, Cumulus (atmospheric water siting), Green Gauge (energy intensity benchmarking).

Other (~2)

Environmental-misinformation browser add-on, a genuine-connection CRM.

Hopamine Green Hackathon · Submissions data sheet · counts are by primary field and approximate (a few ideas span two fields).
